DETAILED ACTION

Response to Preliminary Amendment

Preliminary Amendment filed on 7/1/03 has been entered *and made of record*.

In Preliminary Amendment, applicant cancels claims 1-27, adds new claims 27-43.

Oath/Declaration

The oath/declaration filed on 7/1/03 is acceptable.

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Oath/Declaration

The oath/declaration filed on 6/17/2002 is acceptable.

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 28-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over **claim 1 of Patent 6649480**. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art at the time of the invention was made to providing the heterostructure comprising a planarized surface, located between the strained surface and the Si substrate by introducing the heterostructure comprising an interface, located between the strained surface and the Si substrate in order to define a method of fabricating a CMOS inverter.

Claims 32-43 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over **claims 40 and 42 of co pending application 10005274**. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art at the time of the invention was made to providing the heterostructure having a Si substrate and a strained layer thereover by introducing the heterostructure having a Si substrate, a relaxed $\text{Si}_{1-x}\text{Ge}_x$ layer on the Si substrate and strained layer on the a relaxed $\text{Si}_{1-x}\text{Ge}_x$ layer comprising an interface, located between

the strained surface and the Si substrate in order to define a method of fabricating an integrated circuit with the strained layer exhibiting a surface roughness less than 1nm.
